

## ANSWERS

### Answer 1

4(a)(ii)	<b>1 mark per action to max 2</b>  For example: <ul style="list-style-type: none"> <li>• Prepare an induction</li> <li>• Invite Sophie in before starting</li> <li>• Introduce Sophie to the team</li> <li>• Give Sophie a mentor</li> </ul>	<b>2</b>
4(a)(iii)	<b>1 mark only e.g.</b> <ul style="list-style-type: none"> <li>• Prepare a greeting/introduction</li> <li>• Provide structured support</li> <li>• Invite Sophie to social event(s) before/at the start to meet people</li> </ul>	<b>1</b>
4(b)	<b>1 mark per bullet point to max 3</b> <ul style="list-style-type: none"> <li>• Sophie is confirming that she understands the code of conduct</li> <li>• To make sure Sophie knows what behaviour is expected of her</li> <li>• To make sure Sophie understands there may be consequences of some actions</li> <li>• To ensure all employees adhere to the same standards</li> </ul>	<b>3</b>

### Answer 2

4(c)(i)	<b>1 mark per benefit to max 2</b> <ul style="list-style-type: none"> <li>• She can charge a fee for the game</li> <li>• She retains the copyright</li> <li>• ... so, the game cannot be re-distributed by a third-party without her permission</li> </ul>	<b>2</b>
4(c)(ii)	<b>1 mark per benefit to max 1</b> <ul style="list-style-type: none"> <li>• Potentially better support, as she is charging a fee</li> <li>• Likely to have fewer bugs / less prone to malware than if distributed under other licences e.g. open source</li> <li>• Redress available if the game does not function correctly</li> </ul>	<b>1</b>
4(c)(iii)	<b>1 mark per bullet point</b> <ul style="list-style-type: none"> <li>• They can check it works // check if it meets their requirements</li> <li>• ... without having to paying a fee if it does not</li> </ul>	<b>2</b>

### Answer 3

2(a)	<b>1 mark for each correct term</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> Commercial Licence</li> <li><input type="checkbox"/> Free Software Licence</li> <li><input type="checkbox"/> Shareware Licence</li> <li><input type="checkbox"/> Open Source Licence</li> </ul>	<b>4</b>
------	---	----------

## Answer 4

4(a)	<b>1 mark</b> for naming a principle, <b>1 mark</b> for description to <b>max 3</b> · <b>2</b> <input type="checkbox"/> Product <input type="checkbox"/> Software engineers shall ensure that their products and related modifications meet the highest professional standards possible.  <input type="checkbox"/> Judgement <input type="checkbox"/> Software engineers shall maintain integrity and independence in their professional judgement.  <input type="checkbox"/> Management <input type="checkbox"/> Software engineering managers and leaders shall subscribe to and promote an ethical approach to the management of software development and maintenance.  <input type="checkbox"/> Profession <input type="checkbox"/> Software engineers shall advance the integrity and reputation of the profession consistent with the public interest.  <input type="checkbox"/> Colleagues <input type="checkbox"/> Software engineers shall be fair to and supportive of their colleagues.  <input type="checkbox"/> Self <input type="checkbox"/> Software engineers shall participate in life-long learning regarding the practice of their profession and shall promote an ethical approach to the practice of the profession.	<b>6</b>
------	--	----------

## Answer 5

2(d)	<b>1 mark</b> per bullet point to <b>max 3</b> For example: He should ... <input type="checkbox"/> ...Keep the client's personal data private <input type="checkbox"/> ...Involve the client in the development // ... Communicate with the client <input type="checkbox"/> ...Provide the solution that the client asked for <input type="checkbox"/> ...Keep the project running on time // budget <input type="checkbox"/> ...Keep the client informed of any problems/delays	<b>3</b>
------	--	----------

## Answer 6

5(a)	<b>1 mark</b> per bullet point to <b>max 2</b> <input type="checkbox"/> Encryption <input type="checkbox"/> Assign a unique code so it will not install without this // product key <input type="checkbox"/> Limit the number of times that version of the software can be installed <input type="checkbox"/> Set a time limit within which the software must be installed	<b>2</b>
5(b)	<input type="checkbox"/> Provide an .exe file // Compile the source code // Use a compiler	<b>1</b>
5(c)(i)	<b>1 mark</b> per benefit to <b>max 2</b> <input type="checkbox"/> So that she can sell the software for a fee // make money from the software <input type="checkbox"/> A commercial licence prohibits unauthorised/further copies being made and/or distributed <input type="checkbox"/> A commercial licence prohibits any changes to the software	<b>2</b>
5(c)(ii)	<b>1 mark</b> per bullet point to <b>max 2</b> <input type="checkbox"/> Open Source <input type="checkbox"/> Free Software <input type="checkbox"/> Shareware <input type="checkbox"/> Freeware	<b>2</b>

## Answer 7

3(a)	<p><b>1 mark</b> per bullet point, <b>max 2 marks</b> per licence</p> <p>Open Source</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The source code is released with program</li> <li><input type="checkbox"/> Users can edit the source code to suit their needs</li> <li><input type="checkbox"/> Users re-release their version under the same terms</li> <li><input type="checkbox"/> Can be cost-free but may also need payment</li> </ul> <p>Shareware</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Users get a free trial of the software</li> <li><input type="checkbox"/> ... which may be limited in features</li> <li><input type="checkbox"/> No access to source code // Program cannot be edited</li> <li><input type="checkbox"/> Then they have to pay / sign-up after the expiry date // Then they have to pay / sign-up to get full functionality // Then they have to pay / sign-up to stop unwanted pop-ups, etc.</li> </ul>	4
3(b)	<p><b>1 mark</b> per bullet point to <b>max 2 marks</b> for chosen licence</p> <p><b>Open Source</b> For example:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Hugo does not have to set up ways to take funds</li> <li><input type="checkbox"/> Others may enhance / improve the program</li> <li><input type="checkbox"/> Hugo can charge a fee for the App</li> </ul> <p><u>Or</u></p> <p><b>Shareware</b> For example:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Hugo can charge for the App</li> <li><input type="checkbox"/> Not giving away the code/people can't copy the code</li> <li><input type="checkbox"/> ... Hugo gets the sole recognition for the program</li> <li><input type="checkbox"/> Possible legal consequences if someone does copy the code</li> <li><input type="checkbox"/> If users need to sign up, their data can be used for marketing etc.</li> <li><input type="checkbox"/> Customers have peace of mind that the software hasn't been maliciously edited / bugs introduced</li> </ul>	2

## Answer 8

5(a)	<p><b>1 mark</b> per bullet point for each justification, to <b>max 2</b></p> <p><b>Either Unethical</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Work belongs to the company it was created for // copyright</li> <li><input type="checkbox"/> ... Kevin cannot use it without permission</li> <li><input type="checkbox"/> It reduces the integrity of the person / profession / new company</li> <li><input type="checkbox"/> Reference to IEEE standards <u>in context</u></li> </ul> <p><b>Or Ethical</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The program code could be open source</li> <li><input type="checkbox"/> Kevin might own the copyright of code</li> <li><input type="checkbox"/> Kevin may have permission to use the code</li> <li><input type="checkbox"/> Reference to IEEE standards <u>in context</u></li> </ul>	2
------	--	---

5(b)	<b>1 mark per bullet point for each justification, to max 2</b>  <b>Either Unethical</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> Nadya has accepted a role / work she knows she cannot do</li> <li><input type="checkbox"/> This reduces the integrity of the person</li> <li><input type="checkbox"/> She may let down the new organisation who are expecting her to be able to do the work</li> <li><input type="checkbox"/> Reference to IEEE standards <u>in context</u></li> </ul> <b>Or Ethical</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> She is taking steps to prepare for the role</li> <li><input type="checkbox"/> ... Without expecting the company to do it</li> <li><input type="checkbox"/> Nadya may have told the company that she didn't know the languages but that she would learn them</li> <li><input type="checkbox"/> Reference to IEEE standards <u>in context</u></li> </ul>	2
5(c)	<b>1 mark per bullet point for each justification, to max 2</b>  <b>Either Ethical</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> The individual works as part of the team ...</li> <li><input type="checkbox"/> ... therefore, the team should / will get the credit</li> <li><input type="checkbox"/> Maria is not lying about who produced it</li> <li><input type="checkbox"/> Reference to IEEE standards <u>in context</u></li> </ul> <b>Or Unethical</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> Maria should identify who / where the idea originated</li> <li><input type="checkbox"/> It prevents the individual getting recognition</li> <li><input type="checkbox"/> Maria is not being supportive of the individual</li> <li><input type="checkbox"/> Reference to IEEE standards <u>in context</u></li> </ul>	2

## Answer 9

5(a)	<b>1 mark per bullet point for each justification, to max 2</b>  <b>Either Unethical</b> <ul style="list-style-type: none"> <li>• Noah's work may be confidential</li> <li>• Wendy shouldn't claim someone else's ideas / work as her own</li> <li>• She is bringing the profession into disrepute</li> <li>• Reference to IEEE standards <u>in context</u></li> </ul> <b>Or Ethical</b> <ul style="list-style-type: none"> <li>• The code could be open source</li> <li>• Wendy may have permission from Noah</li> <li>• Wendy isn't copying the code, just getting ideas</li> <li>• Reference to IEEE standards <u>in context</u></li> </ul>	2
5(b)	<b>1 mark per bullet point for each justification, to max 2</b>  <b>Either Unethical</b> <ul style="list-style-type: none"> <li>• Amit has a responsibility to his company</li> <li>• He should have taken it to the police rather than putting it on the Internet</li> <li>• He has a signed agreement to say he will not give anything away</li> <li>• Reference to IEEE standards <u>in context</u></li> </ul> <b>Or Ethical</b> <ul style="list-style-type: none"> <li>• Amit is acting in the public interest</li> <li>• Amit may not have actually signed the confidentiality agreement</li> <li>• If acting illegally, the multinational company should be brought to justice</li> <li>• Reference to IEEE standards <u>in context</u></li> </ul>	2

5(c)	<b>1 mark</b> per bullet point for each justification, to <b>max 2</b>  <b>Either Ethical</b> <ul style="list-style-type: none"> <li>• It might save people's jobs</li> <li>• Farah is acting in the best interest of her company</li> <li>• Reference to IEEE standards <u>in context</u></li> </ul> <b>Or Unethical</b> <ul style="list-style-type: none"> <li>• Farah has a responsibility to act in the best interest of her client</li> <li>• It could give her company a bad reputation</li> <li>• Reference to IEEE standards <u>in context</u></li> </ul>	<b>2</b>
------	---	----------

**Answer 10**

3(a)	<b>Either Ethical</b> <ul style="list-style-type: none"> <li>• He is booking the holiday in his own time / lunchtime // he is self-employed</li> <li>• He has been given permission</li> <li>• Reference to IEEE <u>in context</u></li> </ul> <b>Or Unethical</b> <ul style="list-style-type: none"> <li>• Should not use company computer for personal use</li> <li>• Should be working whilst at work</li> <li>• Reference to IEEE <u>in context</u></li> </ul>	<b>2</b>
3(b)	<b>Unethical: Max 2 marks</b> from <ul style="list-style-type: none"> <li>• Company will get a bad reputation</li> <li>• Should be supporting his colleague</li> <li>• Reference to IEEE <u>in context</u></li> </ul>	<b>2</b>
3(c)	<b>Either Ethical</b> <ul style="list-style-type: none"> <li>• She is supporting her colleague</li> <li>• Working in the best interests of the company</li> <li>• Reference to IEEE <u>in context</u></li> </ul> <b>Or Unethical</b> <ul style="list-style-type: none"> <li>• Praising one team member instead of the whole team</li> <li>• Others in the team may also have contributed, so she is not being supportive of the whole team</li> <li>• Reference to IEEE <u>in context</u></li> </ul>	<b>2</b>

**Answer 11**

5(a)(i)	<b>1 mark</b> per bullet point, <b>max 2</b> <ul style="list-style-type: none"> <li>• Restricted use</li> <li>• Source code not provided // source code protected</li> <li>• Anyone can purchase/download if agree to the terms</li> <li>• Limited number of installations allowed // Software key needed to install</li> </ul>	<b>2</b>
---------	---	----------

5(a)(ii)	<p><b>1 mark</b> for name and <b>2 marks</b> for description</p> <p><b>Either</b> Open Source</p> <ul style="list-style-type: none"> <li>• The source code is released with the program</li> <li>• Users can change / edit the source code to enhance the game</li> <li>• Users can re-release the game under the same terms // the game might spread more easily</li> </ul> <p><b>Or</b> Shareware</p> <ul style="list-style-type: none"> <li>• Users get free trial or limited access for set time</li> <li>• Users do not have access to the source code // source code may not be edited</li> <li>• At end of trial period, users may have to pay or register to continue using the game // Can get people 'hooked' and then charge a fee</li> </ul> <p><b>Or</b> Freeware</p> <ul style="list-style-type: none"> <li>• There is no fee for the game</li> <li>• The game could be copyrighted</li> <li>• Modification, re-distribution or reverse engineering of the game without permission is prohibited</li> </ul>	3
5(b)	<p><b>1 mark</b> per bullet point, <b>max 3</b></p> <ul style="list-style-type: none"> <li>• Firewall / proxy</li> <li>• Encryption</li> <li>• Username and Password</li> <li>• Physical security</li> <li>• Biometric authentication // by example</li> <li>• Two-step authentication // by example</li> <li>• Anti-malware</li> </ul>	3

## Answer 12

6(a)	<p><b>Two marks</b> from:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> A system of moral principles</li> <li><input type="checkbox"/> That guide behaviour / decision making</li> <li><input type="checkbox"/> Based on philosophical / religious views</li> <li><input type="checkbox"/> By example, e.g. respectful and considerate behaviour</li> </ul>	<b>Max 2</b>
6(b)	<p><b>One mark</b> for identifying the issue  <b>One mark</b> for correct principle  <b>One mark</b> for possible action  <b>Max 2</b> issues (2 × 3 marks)</p> <ol style="list-style-type: none"> <li>1 Uncomfortable with one of his colleagues  Client and Employer // Management / Colleagues // Judgement // Self  For example: Team building exercises // arranged meeting</li> <li>2 Unfamiliar with programming language  Self // Client and Employer // Product // Profession // Colleagues  For example: Undergo training</li> <li>3 Visit to unfamiliar workplace  Client and employer // Management // Judgement // Profession // Colleagues  For example: He should speak to his manager to discuss situation</li> </ol>	<b>Max 6</b>

Answer 13

5	<p>The diagram shows a central column of six boxes labeled 'Incident A' through 'Incident F'. To the left are two boxes: 'Ethical' and 'Unethical'. To the right are six boxes: 'Public', 'Client &amp; Employer', 'Product', 'Judgement', 'Management', 'Profession', 'Colleagues', and 'Self'. Arrows indicate connections: Incident A points to Public; Incident B points to Ethical; Incident C points to Unethical; Incident D points to Ethical; Incident E points to Unethical; Incident F points to Product. Additionally, Incident A points to Client &amp; Employer, Incident B points to Judgement, Incident C points to Management, Incident D points to Profession, Incident E points to Colleagues, and Incident F points to Self.</p>	
5(a)	Mark as follows: <b>Unethical:</b> C and E      1 Mark <b>Ethical:</b> A,B, D and F      1 Mark	2
5(b)	Mark as follows: A – Public interest      1 Mark B – Self      1 Mark D – Profession      1 Mark F – Product      1 Mark	4

Answer 14

Description	Open source	Shareware	Commercial
Software is purchased before it can be used			✓
Source code comes with the software	✓		
Software is provided free on a trial basis		✓	
The software can be modified by the user	✓		

## Answer 15

**One mark** for identifying the principle, **one mark** for an example that is in the context of this scenario.

**Maximum of two marks** per principle. **Maximum of three principles.**

**[6]**

- PUBLIC / Software engineers shall act consistently with the public interest.
  - Example in context
- CLIENT AND EMPLOYER / Software engineers shall act in a manner that is in the best interests of their client and employer (consistent with the public interest.)
  - Example in context
- PRODUCT / Software engineers shall ensure that their products and related modifications meet the highest professional standards possible.
  - Example in context
- JUDGEMENT / Software engineers shall maintain integrity and independence in their professional judgment.
  - Example in context
- MANAGEMENT / Software engineering managers and leaders shall subscribe to and promote an ethical approach to the management of software development and maintenance.
  - Example in context
- PROFESSION / Software engineers shall advance the integrity and reputation of the profession (consistent with the public interest).
  - Example in context
- COLLEAGUES / Software engineers shall be fair to and supportive of their colleagues.
  - Example in context
- SELF / Software engineers shall participate in lifelong learning regarding the practice of their profession and shall promote an ethical approach to the practice of the profession.
  - Example in context

## Answer 16

**3 (a) Two from:**

**[2]**

- The source code comes with the software.
- The user can edit the source code.
- Once edited, the software is re-distributed with the changes.

**(b) Two from:**

**[2]**

- The software is purchased.
- With a **licence** which restricts the number of users / possible time period for use.
- The program code for the software cannot be edited.

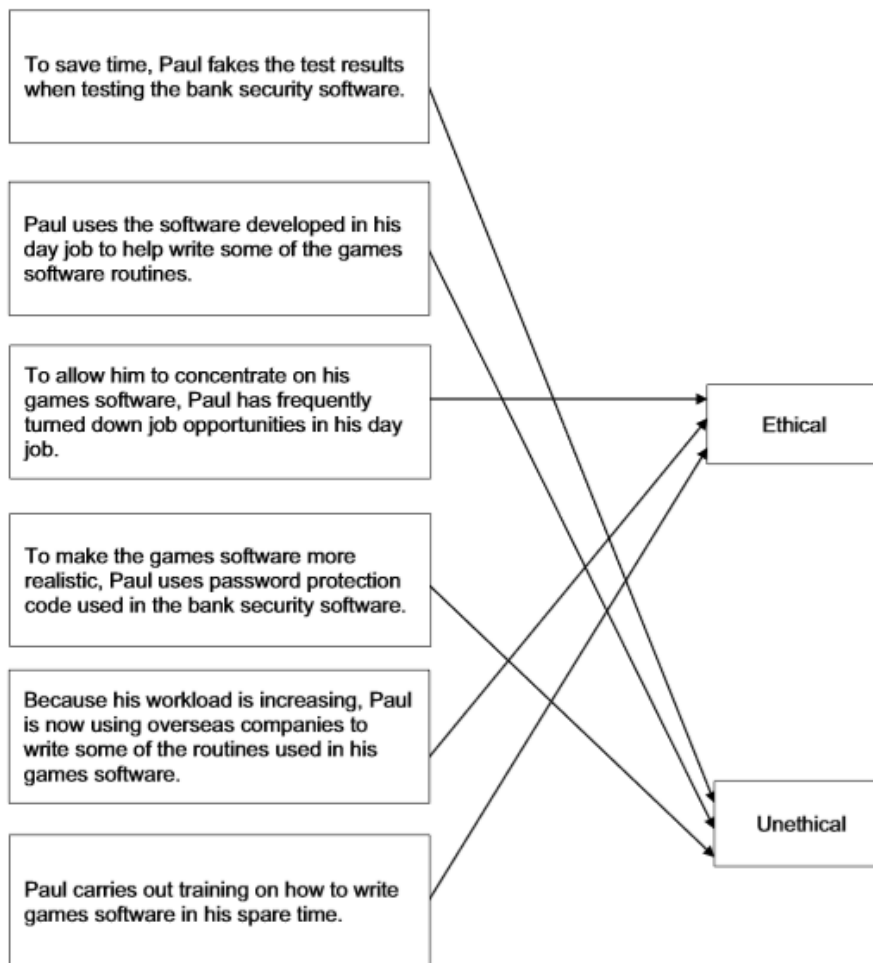

**(c) Four from:**

**[4]**

- Support / training is readily available so help can be accessed if needed.
- More robust software / fewer bugs as it has been tested more thoroughly/by more users.
- Forums / user groups will exist for popular software.
- Software upgrade path likely to be available (at minimal cost).
- Manufacturer develops patches that can be automatically downloaded.
- Compatibility is inbuilt for other commercial software.

## Answer 17

## Answer 18

5 One mark for each correctly placed tick.

Activity	Ethical	Unethical
Gives away passwords used in the intruder detection software		✓
Uses source code developed at the software house for the software he develops for his own company		✓
Insists that staff work to deadlines	✓	
Turns down training opportunities offered by his employer		✓
Writes and sells software that reads confidential data from client computers		✓
Fakes test results of safety-critical software		✓
Has the software applications developed overseas for sale in his own country	✓	

[7]

## Answer 19

10 (a)

Question	True	False
Custom-written software takes a long time to develop	✓	
Custom-written software isn't fully tested		✓
Custom-written software won't have any technical backup		✓
Off-the-shelf software is usually cheaper because costs are shared	✓	
Off-the-shelf software is always compatible with other software		✓

[4]

(b) 1 mark for each benefit + 1 mark for a description

off-the-shelf:

- off-the-shelf software probably has an already trained work force
  - therefore training costs are saved
- off-the-shelf software has many user groups/blogs to gain advice/help
  - therefore more likely to get help if a problem occurs
- a wide diversity of users ensures off-the-shelf software is fully tested under a number of different scenarios ...
  - less likely to encounter problems
- version xxx is probably already on the market
  - upgrades will become available throughout the life of the software without having to pay for any further development

custom-written:

- custom-written software does not contain unwanted features
  - therefore easier to use and more efficient running
- custom-written software can be written to interface with all the company's existing software
  - off-the-shelf software will only be tested against widely available software; the company may have specialist software on its system which will not have been tested with off-the-shelf software

[4]

## Answer 20

(c) 1 mark for off-the-shelf feature and 1 mark for custom-written feature:

**Off-the-shelf software:**

- available straight away
- less expensive since costs shared by other users
- network of users / discussion groups / more training options
- more likely to be fully tested in a number of different scenarios
- more likely to be compatible with other software

**Custom-written software:**

- time to develop the software from scratch
- will only meet the demands of the user / no unnecessary features
- need to rely on software developers if a fault occurs / requirements change
- only available to a single organisation

[2]

## Answer 21

(a) Any **four** points from:

- training will be necessary (this can be expensive for the company and it also takes the workers away from their job while undergoing training)
- possibility of redundancies (for reasons above) but also because the new computer systems may require fewer staff to do the work
- greater productivity – production of work will take less time (e.g. CAD software allows modifications to drawings to be made in a fraction of the time manually)
- possibility of working from home (can email work, use VoIP etc.)
- better working environment for staff (less noisy)
- creation of new jobs....all computer related (e.g. computer maintenance)

**[4]**

(b) 1 mark for each benefit and 1 mark for each drawback

### **off-the-shelf**

#### **benefits**

- usually less expensive since the development costs can be spread over many purchasers of the software
- they are frequently more sophisticated since the money generated from large sales (often global) allows more development work to be done
- there will usually be **user groups** who can give help and support
- the ability to export/import files into/from other packages is often easier since they are more likely to be compatible
- the software is available immediately – there is no need to wait while it is being written and developed
- the software is usually relatively "bug free" since it has been highly developed using feedback and targeted user groups.

#### **drawbacks**

- the software tends to be over-complex since it tries to cover as many aspects as possible; the average user will probably only use a small fraction of the features available
- because of the unwanted features, the software tends to be over-complex in use
- the software may not exactly fit the requirements of the user and may be a compromise
- any major problems for a user (requiring a re-write) will not be resolved quickly – a software re-write may cause problems for other users and may even cause software instability

## **custom-written**

### **benefits**

- these are designed and written to meet the user's specific requirements; consequently, they will be more efficient and won't contain unwanted features
- the writers of the software can develop it so that it will not interfere with other software being used by the company; this will avoid any software clashes
- it is frequently easier to use since the software can be written in conjunction with the end users in mind (the users get exactly what they need)
- any modifications needed (e.g. due to changes in the business requirements) can be done more easily and more quickly since the changes are probably specific to the company
- usually better customer support since the users can be in direct contact with the software designers/writers

### **drawbacks**

- there is much greater dependence on the software company; e.g. if they go out of business then future support may be non-existent
- it is unlikely to be as well developed as "off the shelf" software
- it is usually far more expensive since the development costs have to be met fully by the user
- the development time may be quite lengthy, particularly if the application is unique or complex
- in some ways, the company takes a gamble – the final package may not actually meet the user requirements especially if the development time is long and the company's needs have changed in the meantime

**[4]**
